Up to full bed scan (59" x 96") \$375.00 *Can include more than one artwork or object as long as they meet the criteria outlined below.

When Scanning Multiple Objects in One Scan

Scanning can include multiple pieces of artworks within the above sizes to reduce costs but must meet the following criteria to do so. Exceptions exist so it is best to discuss each project with us so that we can give you an accurate price for scanning and printing.

1. Artwork/objects must be the same height so that accurate focus can be established.
2. Multiple Artwork/objects to be scanned all in one scan must all be flat without warped surfaces.
3. Artwork/objects must have the same texture so that we can set up the lighting for the best possible scan.

Additional Information

3-D objects up to approximately 8 inches in depth can be scanned.

We have successfully scanned paintings up to 23 feet in length.
